- Adhere to preventive maintenance schedules and investment budgets

Apply on line for the maintenance technician positions

This profession exists...

in Group hotels all over the world.

Testimony of Jérôme Godefroy, ibis Paris Gare du Nord La Fayette

*"I studied electrical engineering and information and computer technology for industrial applications, and then specialised in hotel and real estate maintenance. My training was done as a sandwich course so **I was an apprentice at the ibis Paris Porte d'Orléans**, with Mr. Gouygou, the hotel's technical manager, as my tutor. Once I had finished training, **I looked for a job on the Accorjobs website**. I found an open-ended contract as a maintenance technician in an ibis and all seasons. What I like most about this job is **the responsibilities that my supervisors give me** despite my lack of experience, and the fact that every day the work is different, which I find makes it all the more interesting!"*

[Personality](#) | [Activities](#) | [Qualifications/Experience](#) | [Progression](#)

Open minded and efficient
Good with people and helpful
